PREFACE

GUIDING PUPILS to courses, best suited to their interests, abilities, etc., is considered very vital from the educational point of view of the pupils and also from the point of view of the economic development of the country.

Such guidance to be successful, must be based on (1) proper assessment of the interests, abilities, etc., of the pupils, (2) adequate information about the educational opportunities available in the society.

The present monograph is the first of a series, planned to be of use in the second field. Granting that the existing educational opportunities in the State of West Bengal are not what we wish them to be, a perusal of the monograph may surprise many, for not knowing many of the facilities already existing. We do not know enough of what already exists.

It is hoped that parents and guardians faced with the problem of suitable educational placement of their wards would find the monograph a handy guide. It is expected that pupils in higher classes of Secondary Schools (with help and guidance from teachers), would study it to find out which course of study may suit them most. It is desired that teachers, particularly Teacher Counsellors (trained by the Bureau) would utilise the monograph in planning "career talks" and in offering educational guidance to pupils.

It is to be noted that the monograph covers only a very limited field. It confines itself only to insitutional courses and training facilities after the School Final Examination in the State of West Bengal; it does not cover apprenticeship facilities nor does it go beyond the State of West Bengal; the minimum qualification for eligibility to admission to any of the courses listed in the monograph is pasing the School Final Examination.* Gradually, through successive monographs, the Bureau expects to cover the whole field of educational facilities in the State (in certain fields it may even go beyond the State) including scholarships and other educational concessions.

Every effort has been made to keep the information supplied reliable and up-to-date : The following have been the sources of information for the monograph :—

(1) Direct written information from the institutions (including published materials).

(2) Booklet published by the Directorate of Industries, Government of West Bengal.

(3) Publications of the Directorate-General of Resettlement and Employment, Ministry of Labour, Government of India.

(4) University Calender (Calcutta University), etc., etc.

Information supplied in the monograph is not claimed to be exhaustive. It is almost impossible to collect reliable information over such a vast field within a short time. We hope to carry on follow-up work on the monograph. Again, purely private institutions have not been included in the list, as the Bureau has not been in a position as yet to check their *locus standi*.

A word may be said about the classification of courses in the monograph. Our country has not yet developed any authoritative calssification. We have kept the international classification in mind but have deviated from it in few cases because of practical considerations.

At the end, the Bureau thanks the institutions who co-operated with it in answering to its questionnaire and in supplying it with their relevant publications. The Bureau also thanks the Regional Directorate of Resettlement and Employment, West Bengal, for the co-operation received.

*There are a few courses, particularly in the Technical Section (trade courses) to which non-Matriculates are also eligible.

PREFACE

(To the Second Edition)

THE PUBLIC seems to have well received the monograph—its first print being exhausted almost immediately after its publication. The Bureau acknowledges this with gratitude.

The monograph has been made up-to-date and new materials have been added. It is expected to be more useful.

The Bureau thanks the institutions and the Government departments who extended their co-operation to revise the monograph for reprint within a very short time.

INTRODUCTION

What course would you like to take after the *School Final*? Most of the students join Intermediate Science or Arts Class.

BUT

have you asked yourself the following questions ?

(1) Will joining Intermediate Class in Science or Arts ensure me of the best employment ?

(2) Will I be able to do my best in the Intermediate Science or Arts Course ?

(3) Is the Intermediate Science or Arts Course in line with my interests and abilities ?

(4) Are there other courses which I may join with better employment prospects and better success because these are more in line with my aptitudes and interests ?

Do you know that

(1) Employment prospects even after you have passed the I.Sc. or B.Sc. Examination are not very bright. Job-getting will be extremely difficult unless you are very brilliant. Even if you get one, wages may not be worth your education and needs.

(2) Employment prospects after passing the I.A. or B.A. Examination are still less.

(3) The study of employment market shows that there are little prosepcts for those holding general educational qualifications while there are great prospects for those holding speciffic professional qualifications.

(4) In West Bengal, there are at least eight kinds of recognised courses and training facilities available after School Final which may prepare you for different kinds of professions.

(5) Some of these courses may suit your interests and aptitudes excellently.

Look into the following pages. It is possible you may find certain courses which may be the very best for you from every point of view.
